## Dominion Day Program to Commence With Grand Parade

Liberal Prize Money for Sports, Baseball, Football and Softball---Stores and Buildings will be Decorated

**Saturday  
July 1st**

### Program of Events

**\$500.00 IN PRIZES**

D. Gillespie, President

James Wilson, Secretary

Finance Committee: D. Gillespie and H. T. Halliwell  
9.30 a.m. GRAND PATRIOTIC PARADE  
including Fraternal Organizations, Decorated Automobiles, Decorated Bicycles, Boy Scouts, Girl Guides, Brownies, Cubs. Prizes: Autos, 1st \$15, 2nd \$10, 3rd \$5; Bicycles, 1st \$5, 2nd \$3, 3rd \$2; Clowns, 1st \$5, 2nd \$3, 3rd \$2.  
Marshal of Parade, W. H. Garner; Auto Committee Chairman, W. Chapman; Judge of Clowns, Frank Serak; Bicycles, J. Taylor.

**\$10.00 for Fraternal Lodge Best Turnout**

#### CHILDREN'S SPORTS

10.30 Children's Sports, under 10 years; prizes \$50.00. Committee, A. Harry.

#### FIELD EVENTS

1.30 Field Events. Prizes total \$130.00. (See attached list for prizes.)

	1st	2nd	3rd
1. Boys' 75-yard sprint, under 14 years	\$2.00	\$2.00	\$1.00
2. Girls' 75-yard sprint, under 14 years	3.00	2.00	1.00
3. Boys' High Jump, under 16 years	3.00	2.00	1.00
4. Girls' High Jump, under 16 years	3.00	2.00	1.00
5. Boys' 100-yard sprint, under 16 years	3.00	2.00	1.00
6. Girls' 100-yard sprint, under 16 years	3.00	2.00	1.00
7. Boys' 100-yard sprint, under 19 years	4.00	3.00	2.00
8. Girls' 100-yard sprint, under 19 years	4.00	3.00	2.00
9. Boys' High Jump, under 19 years	4.00	3.00	2.00
10. Girls' High Jump, under 19 years	4.00	3.00	2.00
11. Men's High Jump	5.00	3.00	
12. Men's Running Broad Jump	5.00	3.00	
13. Men's Quarter-Mile Race	5.00	3.00	1.00
14. Men's 100-yard sprint	5.00	3.00	1.00
15. Old Men's Race, over 50 years (handicap)	5.00	3.00	1.00

No entrance fee charged, but competitors must purchase an admission tag and wear it. Committee in charge, Bruce M. Hall.

(Five entries necessary before three Prizes can be awarded

Events will be run in order given.

#### BASEBALL

11.00 First prize \$50; second \$25; three teams to enter. Committee in charge, W. Cousins. Time of games to be arranged.

#### FOOTBALL

2.00 and First prize \$55.00; second \$27.50; three teams to enter. Committee in charge, Peter Smith. Time of games to be arranged.

#### SOFTBALL (LADIES' TEAMS)

1.00 \$22.50 in prizes, three teams to enter; \$22.50 in prizes. Committee in charge, W. H. Garner.

#### SOFTBALL (MEN'S TEAMS)

1.15 Men's Softball, three teams to enter; \$22.50 in prizes. 2.30 Ladies' Races; prizes \$20.00 and five pair of sneakers. Committee in charge, W. H. Garner.

#### ITALIAN HAND-BALL

\$27.00 in prizes, three teams to enter, or more. Committee in charge, A. Tognano.

NOTE: No entry fees will be charged, but competitors in all events are to purchase admission tags and wear same.

Coleman Band in attendance under Bandmaster Easton.

All athletic and other competitors are requested to join in parade at 9.30 a.m.

#### ENTRIES FOR TENNIS TOURNAMENT

#### GALT MINERS FOOTBALL CLUB EXPECTED HERE SATURDAY

Many entries are expected for the open tennis tournament which will commence here on Saturday. Coleman courts are noted through the Pass and with pleasant surroundings are favored by Pass players. Maintenance has always been a strong point here, for which the club management are to be commended.

#### GRAMMATICAL ERROR COMPETITION

Six contestants discovered the grammatical error in last week's advertisements, the first drawn from the box being that of Howard Campbell, who, wins 50c.

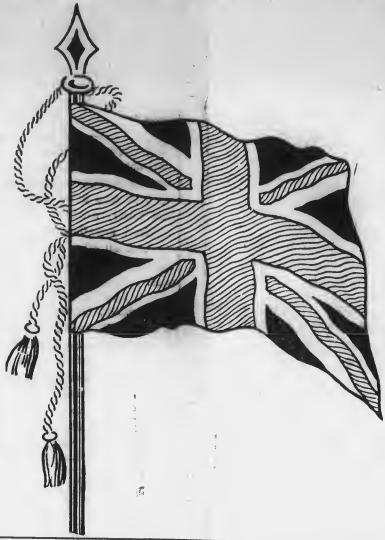

The others in the order drawn were Jean McLeod, Roy Taylor, Herbert McMullen, Betty Thomas, Geo. McMullen. Joe Sikora sent in a slip marked McGillivray.

The error was in E. Ledieu's ad. The word was guarantees, which to be correct should have been guarantee.

The question for this week is: Which is the highest mountain in the Crows' Nest Pass district? Write answers on sheet of paper, enclose in envelope with name, and the first drawn from box on Monday evening, July 3, will be awarded 50c.

To help in raising funds for the war memorial, the Canadian Legion will operate a Bingo booth on sports day.

How about your subscription to the Journal? Do it today!

INDICATIONS ARE THAT DOMINION DAY WILL BE A GLORIOUS HOLIDAY IN COLEMAN

Commencing with a grand parade, starting at 9.30 from Central school, headed by Coleman Citizens Band under Bandmaster Alex. Easton, and proceeding to Cameron school, West Coleman, Dominion Day will start off with a wave of enthusiasm and goodwill in which it is expected over 3,000 people will take part.

Fraternal societies, Boy Scouts, Girl Guides, Brownies and Cubs, decorated automobiles and bicycles, and clowns, will be offered prizes for the best turnouts.

Arriving at Cameron school, the contingent from West Coleman will join the procession and march back to the sports field, where after a brief interval, the children's races will be run.

Competitions for softball, baseball, football, Italian handball will be held, besides a good programme of field events. The full programme is printed on this page.

The committee men in each event are asked to be on hand promptly to see that the various competitions are carried through according to schedule.

Favored by fine weather, Coleman should experience a very enjoyable sports day. Many from other Pass towns have signified their intention of being present, and the competitions have already drawn a number of entries.

#### SCOUT NOTES

The Boy Scouts will meet on Friday evening at St. Albans' hall at 6.30. Important business—Reg. Jones, acting scout master.

The Bellevue troop of Scouts will go into camp at the district campsite on Monday, July 3. The flags recently donated by Mr. G. A. Vissac, general manager of West Canadian Collieries Limited, will be dedicated on Wednesday, July 5, at 6 p.m. The Rev. A. S. Partington, district chaplain, will officiate at the dedication ceremony.

The district council of Crows' Nest Pass Boy Scouts Association, will meet this evening in Blairmore at 8.30, to complete arrangements for the annual camp at McGillivray Creek.

READ CAREFULLY THE GROCERY SPECIALS—YOU'LL SAVE MONEY.

#### MERCHANTS ASKED TO DECORATE STORES FOR DOMINION DAY

Storekeepers, property holders and citizens generally are asked to decorate their buildings and help to give a holiday appearance to the town for the annual celebration on Saturday. It is expected that many visitors will be here for the sports. Give them a good impression.

#### ORDER OF PARADE

Start at 9.30 sharp from Central school. All children start from Central school. Fraternal societies assemble on east side of First ave. from vendor's store to hospital. Decorated bicycles, Boy Scouts, Girl Guides and Brownies, assemble west side of First ave., from garage to school grounds. Decorated cars assemble on First ave., south of rink and all other cars.

Four detachments of First Aid will march at intervals in parade.

Route of Parade—Main street to Second ave., west to Second street, Second street to Central ave., thence to sports ground.

West Coleman children will meet at Cameron school at 9 a.m., and march to town headed by band, to Central school.

#### SUBSCRIBERS TO SPORTS FUND

D. Gillespie and H. T. Halliwell interviewed most of the business men and secured donations for the prize list for Dominion Day. The list of donors will be published next week, as well as the expenditures. Those who have not contributed may advise either of the above, who are the finance committee for the Dominion Day sports. Appreciation is expressed for the good response.

S. W. Chahley, of Grand Forks, B.C., has opened a watch and jewelry repairing shop on Central avenue.

#### SOFTBALL AND BASEBALL TEAMS DRAW FOR DOMINION DAY

**MEN'S TEAMS**—Frank Canadians (Bye); 10.30, Hillcrest Cardinals vs. Rushton Rovers; 11.30, Rahal Aces vs. East Coleman; 12.30, Crownwest Cleaners vs. Maple Leaf Mohawks; 1.30, Blairmore Maroons vs. Hillcrest Outlaws; 1.30, Coleman Falcons vs. Coleman Cats.

**Ladies' Teams**—Coleman Co-eds (Bye); 10.30, Coleman Adanacs vs. Ferries.

**Baseball Teams**—11.00, West Coleman vs. Natal-Michel; 2.30, Gentle's team vs. Maple Leafs; 6.00, final game.

**Italian Handball**—Coleman vs. Maple Leafs, Hillcrest vs. Michel. Winners of each of these games to play final for first prize.

#### COMPENSATION BOARD HERE

On Tuesday morning the Workmen's Compensation Board of Alberta, under the chairmanship of Alex. Ross, Mr. McNeil and Dr. Groff, dealt with twelve applicants who have suffered injuries of various kinds.

Representatives of the various unions were present in addition to the applicants. For the U.M.W.A., Angus Morrison appeared; for Coleman Miners Association, D. Gillespie, and for the M.W.U. of C., R. Sudworth.

*"Fresh from the Gardens"*

Who Owns Canada?

The question which appears as the heading of this article was included in examination papers recently submitted to pupils in Montreal schools under the jurisdiction of the Catholic School Commission or that city. Answers to the question revealed such vague and uncertain knowledge regarding the status of the Dominion that the Commission appealed to the Secretary of State at Ottawa for an authoritative definition of Canada's status within the British Commonwealth of Nations, and among the world of nations.

The answer, given over the signature of Hon. C. H. Cahan, Secretary of State, defines Canada as a self-governing state of the British Commonwealth of Nations. It sets forth that Great Britain does not own Canada any more than Canada owns Great Britain; that Canada and Great Britain are each independent parts of the British Commonwealth, and that the Dominion belongs to the people of the Dominion.

This answer should set at rest a large amount of uncertainty among Canadians regarding the official status of the land of their birth. It was evident from the answers submitted in the school examinations at Montreal that the subject had not been sufficiently emphasized by the teachers, and the secretary of the Catholic School Commission has stated that in future more attention will be paid to it. It would be well if this was done, not only in the Catholic schools of Montreal, but in all schools throughout the Dominion.

Canada is today an absolutely free and independent nation—just as much so as any other nation in the world. The King of Canada is George V. He is also King of Great Britain, King of Australia, Emperor of India. In Canada the King is represented by the Governor-General, who is appointed by the King on the advice of the Government of Canada. At one time the Governor-General was appointed on the advice of the Government of Great Britain, and he represented that Government, as well as the King, in Canada. But not now—he represents the Crown only, while the British Government is represented in Canada by a Commissioner in the same manner as the United States, France and Japan are represented by Ministers, and Canada is represented in Great Britain by a Commissioner; just as other countries are represented there by Ambassadors and Ministers.

The term and status of "Commissioner" is employed because between two Dominions of the British Commonwealth because each have a common sovereign and such a sovereign does not send an Ambassador or Minister to represent him to himself as he does to represent him to other sovereign nations. The Crown being represented in the person of the Governor-General, the King's several governments are represented the one to the other by Commissioners.

The question may be asked: If Canada is an independent, fully self-governing Dominion of the British Commonwealth of Nations, why does it not enjoy the power to amend its own constitution, and why are appeals taken from decisions of the Supreme Court of Canada to the Privy Council in Great Britain? Other nations, it may be urged, have power to amend their own constitutions, and their Supreme Courts are final courts of appeal.

The answer is, that Canada can exercise both these powers whenever the people of Canada desire to do so, and probably the time will come when they will so decide. Up to the present, however, Canada has preferred to retain to itself the right of carrying judicial appeals to the impartial tribunal of the Privy Council, especially in all matters in dispute between the Federal and Provincial Governments. There is no compulsion that it should do so, and it can refrain from so doing, or can abrogate that right should it deem it wise to do so.

So, too, in regard to amendments to the Canadian constitution. The B.N.A. Act created a confederation of Provinces, reserving to the Dominion certain exclusive powers on the one hand and certain other exclusive powers to the Provinces on the other hand, while in regard to some matters jurisdiction was divided between the two authorities. The Provinces, therefore, have as much right as the Dominion itself to say when and how the constitution shall be amended, and up to the present time certain of the Provinces have preferred to leave the matter as it was at the time of Confederation, with the British Parliament making such amendments to the constitution of Canada as the Parliament of Canada, with the consent of the Provinces, may request. But Canada can secure full and final control over its own constitution if and when the people so desire.

So, the complete and final answer to the question: "Who Owns Canada?" brings us back to the definition given by the Secretary of State at Ottawa, the Dominion belongs to the people of the Dominion. They are masters of their own national destiny. Nobody can tax them but themselves; they pay tribute to no other nation. Canada can make its own treaties with other nations irrespective of the effect such treaties may have upon other Dominions of the British Commonwealth.

But, because the Dominion belongs to the people of the Dominion, the great responsibility rests upon them as citizens of a sovereign nation among the nations, with absolute equality in the League of Nations, to govern themselves, and to so conduct their national and international relationships, as to command the respect and wield a great influence for good in the world. There should be no spirit of a narrow nationalism in Canada; quite the reverse.

**Mayors Are Youthful**  
The new mayor of Detroit is 31. Recently J. F. Pringle, general manager of the Canadian National Railways, received youthful to be assuming such a high position. He is 25 years old and everyone is commending his youthfulness. He is the following wire from A. MacNab, at Peterborough.  
"C.N. 403102, shipped by 33 years old and that he is now well into his second term. He was 30 when he took on the job and, furthermore, he had had no aldermanic experience. The mother is in charge."

**Border Cities Star.**  
The hottest place in the world is Ladas, an isolated province of Kashgar, among the Himalayan glaciers. You've noticed who does the most marching in parades.

Of course women are vain creatures who like to be looked at but mir, among the Himalayan glaciers, you've noticed who does the most marching in parades.

The day temperature at this season often reaches 160 degrees.

few people escape an attack of summer complaint. It may be slight or it may be severe, but both the young and the old are liable to it during the summer months. You cannot tell when it seizes you how it is going to end. Let it run for a day or two and see how weak and prostrate it will leave you.

On first sign of an attack of any looseness of the bowels take a few doses of Dr. Fowler's Extract of Wild Strawberry and see how quickly it will give relief.

Manufactured only by The T. Milburn Co., Limited, Toronto, Ont.

### Chemical Products

**Depression Does Not Seem To Affect Demand For Toilet Preparations**  
It is evident from the study of the recently issued government report on the production of chemicals and allied products in Canada in 1932 that the depression has practically no effect on the demand for toilet preparations. In 1928 the selling value of these preparations at the plants where they were made was \$4,618,291. In 1931 the value of the output had risen to \$5,946,292 and in 1932 it was \$5,073,134.

The demand for medicinal and pharmaceutical preparations continues on the upgrade. In 1928 the combined value of these products made in Canada was \$17,224,351 and in 1932 it was \$18,145,573, the high mark of \$19,038,894 being reached in the memorable year of 1929 when for several months prices of every commodity were at their highest point.

The chemical and allied products industry in Canada is a substantial one. Last year the aggregate production had a value of \$95,540,340. It is divided into 14 groups and there are 628 factories, most of which are in the Provinces of Ontario and Quebec. The 14 groups are as follows: coal tar distillation; acids, alkalis and salts; compressed gases; paints, pigments and varnishes; soaps and washing compounds; medicinal and pharmaceutical preparations; toilet preparations; fertilizers; wood distillation; inks; adhesives; polishes and dressings; flavouring extracts, and miscellaneous chemical industries.

Imports into Canada under the classification of chemicals and allied products were valued in 1932 at \$27,861,580. About 62 per cent of \$17,273,161 was purchased from United States and 17 per cent, or \$4,719,074 from the British Isles. Exports from Canada increased slightly in 1932, the total value being \$11,033,179 as compared with \$10,848,946 in 1931. United States, United Kingdom, Mexico, Portuguese Africa, Newfoundland, Hawaii, Australia, British India, Netherlands, Cuba and China in the order named were the main purchasers of Canadian chemicals and chemical products.

### Membership Shows Decrease

**Quakers Are Having Controversy Over Members By Birthright**  
Membership of the Society of Friends—the Quakers—shows a slight decrease in Great Britain during the last 12 months. There are now 19,119 registered members compared with 19,218 in the peak year of 1916.

The Society of Friends is one of the few religious bodies into which a child is accepted at birth, without either baptism or, at a later date, confirmation or confession of faith. This "birthright membership" recently has been seriously criticized, and it is now possible for Quaker parents to delay the acceptance into membership of their children until the young people are of an age to decide theological matters for themselves.

Last year the society accepted by conviction 219 new members, 47 fewer than in 1931, while 130 individuals either resigned or were disowned or dissociated. There were registered 89 "birthright" members and 50 minors; but 318 Friends were lost to the society by death.

### More Freight Moving

**Transportation Situation Shows Signs Of Improvement**

The transportation situation in Canada is showing considerable improvement and reflects the increasing confidence of the buying public and improving internal and external commerce, said a bulletin issued by the Department of Trade and Commerce. Carloadings for the week ending June 10 numbered 40,842 cars, an increase of nearly 2,000 cars over the preceding week and representing the largest movement of freight in 34 weeks.

"Movement of merchandise freight, representing as it does the shipments from manufacturers to wholesalers and wholesalers to retailers showed a marked improvement," said the bulletin. "Movement of merchandise by railroad has climbed up to nearly three-quarters of normal while that via canal boats in May was approximately double that of the corresponding month last year. Iron ore passing through the Sault Ste. Marie Canal was heavier by over 8,000 per cent, and bituminous coal was practically double that of May, 1932.

There is a saying that heaven will protect the poor working girl. "But who will protect the guy she is working?" asks a college wisecracker.

### HAD RHEUMATISM FOR 20 YEARS

#### But None Since 1930

"This man must have something like a record for suffering. He is 80 years old and I have been a great sufferer with rheumatism. I am pleased to say that I have been able to do this. I have been free from that dreadful pain only by taking Kruschen Salts and nothing else. You know what is just like his and everyone else's. It is caused by sharp-edged uric acid crystals getting into your joints. Kruschen will dissolve those crystals and get rid of them if you keep up the 'little daily dose' ever afterwards, it will never be possible for them to form again. Rheumatism will be gone for good."

#### Joy-Riding By Air

#### New York People Have Money For Extravagant Notions

Late one night the staff of St. Hubert Airport, near Montreal, had word that an airplane was coming in, and they turned on the beacons and lights.

At 12:30 midnight the plane arrived from Roosevelt Field, New York. There alighted two men and a woman, in evening clothes. A taxi cab was waiting and it hurried them away to Montreal.

Just before four o'clock the party returned, boarded the plane, and were back in New York for an early breakfast.

Thus between sunset and morning these people travelled to Montreal, had three hours in that city, flew home in time for work. The cost of the outing was about \$500. If the incident has a moral perhaps it is that New York still has money for extravagant notions—and that the new beer has not destroyed the strong attraction of Montreal for its wealthy neighbors.—Ottawa Journal.

#### Use Of Anti-Toxin

#### New Treatment Of Diseases Of Children Is Reported

New developments in treatment of two diseases of children, scarlet fever and whooping cough, were reported to the American Medical Association.

There is hope that it will be possible to immunize infants against whooping cough just as they are protected from diphtheria, by treating them with a vaccine, said Dr. Louis W. Sauer, of Evanston, Ill.

Tests showed, he said, that not one of the children he vaccinated contracted the disease.

Use of anti-toxin in cases of scarlet fever has been definitely shown to reduce severity of the disease and its dreaded complications. Dr. Luke W. Hunt, of McCormick Institute for Infectious Diseases, Chicago, reported, summarizing study of more than 2,000 cases.

The anti-toxin should be given within the first day or two after the patient becomes ill with scarlet fever, he said.

#### Smashing the Atom

#### Powerful Hammer Devised By Scientists Accomplishes Feat

The most powerful hammer yet devised for smashing the centres, or cores, of atoms, which are believed to hold the secret of how all matter is built, was described before the American Association for the Advancement of Science.

This atom-smashing hammer is the deuterium the infinitely small but enormously powerful core of the heavier of the two atoms of hydrogen which fired like a bullet into the cores of atoms that are to be smashed. Latest results of its use were reported by Drs. Gilbert N. Lewis, M. Stanley Livingston and Ernest O. Lawrence of the University of California.

#### Removed Half Of Brain

Removal of almost all of the right half of a woman's brain with no noticeable effect on her mentality and only partial paralysis on the left side was reported to the American Medical Association. Twenty months after the operation, Dr. Gardner said, "examination disclosed no change in intellect."

The Irish Free State expects many visitors from America this summer.

### Permanent Exhibition Planned For London

#### Alexandra Palace May Be Turned Into Amusement Place

There is a prospect of London being endowed with a permanent "Wembley Exhibition." The Alexandra Palace, on the northern heights of London, Eng., which has long been the despair of all concerned with it, has been taken in hand by no fewer than 18 local authorities, who have recommended grants for its modernization which will amount to \$1,000,000. It is proposed the Palace should be renovated as to convert it into a first-rate place of exhibition and general amusement.

The history of the Alexandra Palace is a dreary one. It was opened exactly 60 years ago as a northern rival of the Crystal Palace, which stands on the southern hills bordering London. A fortnight after its opening it was burned out. Shortly after it had been rebuilt it was compelled to close owing to lack of funds, and remained closed for nine years.

For years following, it had fatal bursts of enterprise. At length money was subscribed to save the park from falling to the speculative house builder. The park, which extends to almost 200 acres, was a valuable acquisition, but nobody ever had been able to do anything effective with the great sprawling palace itself. During the war it made good use, first as a harbour for Belgian refugees, and later for German prisoners.

The only good thing in the Palace is the great organ. This was the masterpiece of "Father" Henry Willis. Music-lovers of North London a few years back contrived to find the money to make the organ as good as new, and week-end concerts at the palace have been popular.

#### Social Progress

#### Must Keep Pace With Scientific Advance, Says Hon. R. J. Manion

Social progress must keep pace with scientific advance in order to bring about an equitable distribution of the world's products, Hon. R. J. Manion, Minister of Railways and Canals, told the Canadian Electrical Association at their annual banquet at Lucerne-in-the-Quebec.

Dr. Manion urged that not only public men but business men and scientists give serious thought to bringing about social reforms that would enable a greater number of the people to share the benefits of what they produce.

The minister made electrical development the theme of his address but touched only on the problems of the day and the world economic conference. It was inconceivable, he said, that the conference would fail to achieve its end. If there should be difficulties between the European nations and United States, Canada would be in an excellent position to act as an intermediary, Dr. Manion said, but he did not anticipate any such difficulties would arise.

He expressed the belief that the vast majority of people in Canada were opposed to the export of electrical power, not only because it was a direct loss to industrial possibilities in the Dominion, but because of the great difficulty in shutting off power from a friendly country once communities had been built up in the power exporting area.

#### Cypress Hills Park

#### Highest Elevation Of Any Park Of Saskatchewan

Cypress Hills Park, known as the Highlands of Saskatchewan, will be officially opened this year. This park is 20 miles south of Maple Creek and has the highest elevation of any part of the Province of Saskatchewan. Some of the streams in the park flow south to the Missouri River and some flow north to join the Saskatchewan River and then to Hudson Bay. The main park is 4,900 feet above sea level and part of it is even higher than Baitz, the famous mountain resort in Alberta. New buildings in the park include one lodge with 18 large rooms and a number of log cabins.

#### French Radon Licensed

Under the new Finance Law radio owners in France must have a license. Owners of crystal sets are compelled to pay \$1 a year, and owners of valve sets \$3. Sets installed in places where the public may listen are licensed for \$6.25 or \$12.50 if the public pays an admission fee.

Fax was grown on 24,000 acres in England in 1870; nowadays probably the only fax produced is on the King's Sandringham estate.

England's Russian population now totals 67,925.

### Fragrantly Yours

Your Pipe Knows Ogden's Cut Plug

#### Ingenious Excuse For Speeding

#### Thought Fire Engine Was Coming Said San Francisco Girl

The excuses proffered by our young women motorists when caught speeding are curiously lame and hackneyed, complained a correspondent of the Manchester Guardian.

Why not emulate a girl friend over in San Francisco, who declared, truth positively radiating from her big blue eyes, that she thought a fire engine was behind her, and that it was up to her to hurry to get out of the way. She was chased by motorcycle police, and did not stop until two shots had been fired by them. Why are not our own traffic police encouraged by "the Yard" to tackle their job in this modern and virile way? At least a machine gun might be stationed at busy spots along bypass roads during summer weekends to increase respect for the law, even if it were to fire only blank.

**Tax-Free Bond Ruling**  
Tax-free Victory bonds forfeit that exemption when they are paid out by a company to its shareholders in the form of dividends. This was the judgment of the supreme court of Canada, Mr. Justice Lamont dissenting, on an appeal taken before it by D. J. Waterous of Brantford. The judgment dismissed the appeal with costs.

An historian announces that women used cosmetics in the Middle Ages. Women still use cosmetics in the middle ages.

More than 10,000 Alberta silver fox furs were placed on sale at the first annual sale of pelts in London this year.

Has a hundred uses. Always have a box in the kitchen.

# Premier Bennett Says Exchange Fluctuations Cause Of Trouble

London, Eng.—Failure of the world's economic conference would result in the establishment of state-controlled economic systems, Prime Minister R. B. Bennett, leader of Canada's delegation to the international assembly, declared Sunday in a broadcast address which was transmitted throughout Canada and the United States.

He concluded his address on an optimistic note. "After participating in the deliberations of the conference for the past two weeks," he said, "it is still unthinkable that delegates from practically every nation of the whole world will separate without agreeing upon the means that must be taken to effect the common purpose, the restoration of the prosperity of the world and the saving of our dearly bought civilization from destruction."

The Prime Minister listed four problems which, until solved, "no permanent improvement can be secured."

1. The general level of wholesale prices must be raised.
2. Exchange must be stabilized.
3. Some international monetary standard must be established as soon as possible.
4. The channels of international trade must be cleared.

The present economic system was not really to blame for present conditions, Premier Bennett said. Exchange fluctuations had created conditions which prevented the system from functioning.

Alluding to the serious situation which had arisen from the heavy world carry-over of wheat, Mr. Bennett said:

"Here is a problem that can only be effectively dealt with by international agreement followed by such appropriate action by each state as is necessary to accomplish a common purpose. We have not failed to recognize that unless such action has the general approval of the consuming countries, it will fail of a full measure."

In the course of an analysis of the reasons why the decline in the prices of some commodities had been more rapid than in others, Mr. Bennett explained the significance of this fact to the farmer. "The gross value of farm production in Canada and the United States had fallen by more than 65 per cent. from 1929 to 1932."

## Taking Part In Gold Rush

Many Indians Using Sailing Canoes To Reach North

The Pas, Man.—Flocks of sailing canoes, loaded to the gunwales with freight, and manned by Crees, are now drifting ahead of the breezes of the northern lakes, heaving the new summer's gold rush in God's lake.

The purr of the outboard motor is heard right across the hinterland. Even Indians, without the cash to secure outboards, have jumped into the "rush" with canoes, and are swinging paddles, oars and sweeps, as they freight their way into the mineralized zone.

### Grasshopper Invasion

Winnipeg, Man.—Thirty thousand acres of green crops in Winnipeg, municipality, southwest Manitoba, were threatened with destruction by an invading horde of grasshoppers as western Canada's wheat lands, baked by a searing sun during last week's heat wave, failed to receive the much-needed moisture promised.

## Aeroplane Tragedy

Capt. Broach and Two Mechanics Lose Lives In Air Crash

Prince Albert, Sask.—The first aeroplane tragedy of the year in northern Saskatchewan claimed the lives of three men near the Brooks air base at Emma Lake, 30 miles north of here.

The dead are: Capt. E. W. "Bull" Broach, pilot, 42; Hiriam C. Brooks, pilot-mechanic, 24; T. D. Forsyth, mechanic, 28.

Broach, well known western commercial flyer, who served with the Royal Navy Air service in France and later with the famous Dover patrol, was testing a reconditioned Buhi plane at an altitude of 2,000 feet. With him were Brooks and Forsyth, mechanics of the Brooks Airways, Prince Albert.

In the middle of their tests the plane dropped in a spin for some unknown reason and plunged into a bay of the lake just north of the air base, at 4 o'clock in the afternoon, after the machine had been put into several spins and loops by the pilot. The plane falling into about 10 feet of water, was smashed to pieces and the engine buried in the bottom of the lake.

The bodies of Broach and Forsyth were recovered shortly after the crash, while Brooks' body had not been recovered. The lake bottom was being dragged for the third body. Forsyth, mechanic, was scarcely recognizable, while Broach's head was badly smashed. Brooks was the son of R. D. Brooks, of Prince Albert, president of Brooks Airways.

## U.S. Naval Program

Plan To Spend Millions On Ship Construction During Next Year

Washington.—The acting secretary of the United States navy, Henry L. Roosevelt, said that the navy plans to spend \$86,000,000 on ship construction in the 1934 fiscal year, which begins July 1.

Roosevelt explained that \$40,000,000 would be expended on ships already under construction and at least \$46,000,000 in starting the new \$2 ship programme for which Present Roosevelt has approved a \$238,000,000 allotment out of the public works fund.

Secretary Swanson previously has said that 85 per cent. of naval construction goes to labor.

## Lord Montagu Is Fined

Found Guilty Of Common Assault On John Forbes

Victoria, B.C.—Lord Edward Montagu, the second son of the Duke of Manchester, was found guilty of common assault on the person of John Forbes on June 15 and was fined \$20 and \$7 costs, or, in default ten days in jail, by Magistrate George Jay in provincial police court here. C. W. Brooks, chief defendant, was found guilty of assault causing grievous bodily harm, and was fined \$50 and \$7 costs, or, in default, one month in jail. Montagu's fine was paid and he was freed.

### Theft From Mint

Ottawa, Ont.—John R. Wallace, a member of the Royal Canadian Mounted Police, pleaded guilty in police court here to stealing \$65 in gold coins from the Canadian mint. He was remanded for sentence.

## Irish Free State Criticizes Punitive Tariff Imposed By Britain

London, Eng.—The Irish Free State quarrel with the United Kingdom arising from the nonpayment of the land annuities was brought before the world economic conference in an attack on the practice of imposing punitive tariffs.

The United Kingdom-Irish Free State tariff war was brought to the notice of the conference by Senator Joseph Connolly, Free State Minister of Lands and Forests, in a blunt speech before the private meeting of the sub-committee on commercial policy.

After dealing with the causes of the

## Aids To Navigation

To Install Direction Finding Stations In Hudson Bay Area

Ottawa, Ont.—Paving the way for renewed efforts to reduce insurance rates on the Hudson Bay route, the federal marine department will shortly commence construction of a short wave direction finding station at Chesterfield, on the east shore of the bay, a considerable distance north of Churchill.

Installation of additional navigation lights in the strait will not be undertaken this year. The department has no funds for this purpose and, in addition, further survey work is necessary to determine the precise location of the points at which lights would be erected.

It is necessary to be able to mark all lights on navigation charts with absolute accuracy so that navigators when they see a light may fix their position. Hitherto a detailed hydrographic survey of the north shore of the strait has not been carried out and if lights were built this year only approximate position could be given.

The direction finding station at Chesterfield is deemed the most important contribution to the Bay route that may be made at this time. This station will give cross bearings on the line from Nottingham Island to Churchill. At the present time there are stations at Nottingham and Churchill but bearings are difficult to obtain.

This is the official reaction of the marine department to the annual report of the Imperial Shipping committee on the Hudson Bay route.

## Ruling Not Changed On Wheat Preference

British Customs Must Have Proof Of Direct Consignment

London, Eng.—The government was questioned in the House of Commons recently as to whether it had been possible to make arrangements whereby Canadian wheat could be shipped to the United Kingdom through United States ports and still get the British preference of six cents a bushel. It was explained this could be done provided the requirement of proof of direct consignment from Canada was met.

Leslie Horne-Belisha, financial secretary to the treasury, said there had been no change in this respect, but certain trade interests had recently had discussions with the customs department when the types of evidence which could be accepted by the British customs as showing that such wheat was consigned to this country from Empire points were fully explained.

## Brighter Outlook

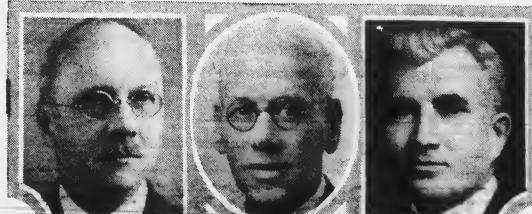

Twenty Thousand Men Added To Industries In The East

Winnipeg, Man.—Saying that in May alone 20,000 men had been added to industries in the east and that in his trip through the west he had found hundreds of new men employed in mining, lumbering and manufacturing. Hon. H. H. Stevens, Minister of Trade and Commerce, said trade and commerce in the Dominion was encouraging. "Transportation is decidedly brighter," he said. "Cargo loading and passenger transportation both show marked improvement. Capital are moving well and 40,000 head will be shipped to Britain this season."

**May Make Northern Survey**

New York.—Colonel Charles A. Lindbergh is considering a flight to Greenland and Iceland this summer to take charge of an aerial survey of that territory for the Pan-American Airway system, of which he is technical adviser. Such a flight, apparently, would carry him into Canada.

## DISTINGUISHED FIGURES IN WORLD CONFERENCE

Canadians occupy a prominent place in the World Federation of Education Associations which is to hold its fifth Biennial Conference in Dublin, Ireland, this month. It will bring together outstanding educational leaders from forty or more countries with the object of cultivating and developing international good will and exchanging views on educational matters. The Dominion is represented by Harry Charlesworth (seizure), Vancouver, B.C., as vice-president of the organization; Dr. E. A. Hardy (right), Toronto, as Treasurer, and Dr. D. D. MacDonald (left), Toronto, a member of the board of directors.

## REPRESENTS CANADA

Dr. Frank D. Adams, Emeritus Vice-Principal of the Faculty of Applied Science and Logan Professor of Geology and Paleontology at McGill University, who has been appointed to represent the National Research Council at the International Geological Congress which is to meet in Washington from July 22 to 29.

## Attempt Is Made To Secure Lower Tariffs On Wheat Imports

### Marine Insurance Rates

Expect Lower Rates May Be Obtained For Bay Route

Ottawa, Ont.—The report of the imperial shipping committee in which it found that the insurance rates on hulls and machinery on ships trading into Churchill could not be reduced this year, but the minimum rate was extended to apply to ships leaving Churchill as late as Oct. 7, instead of the previous limit of Sept. 30, was made public today by the department of marine.

The report appeared to be optimistic that lower rates might prevail in subsequent years if safety of the Hudson Bay route were demonstrated.

The report considered at length the ocean traffic into Churchill during the 1932 season when 10 cargo vessels made the passage through Hudson Strait and into Churchill. Nine made successful voyages and one, the "Bright Fan," was a total loss after striking an iceberg.

Reference was made to the former report which the committee explained that "as long as there are only a few voyages in the season, a single casualty may quite likely absorb the whole or more of the money received by way of premium."

## Forest Fires In Ontario

Swept Over Fifteen Mile Stretch Near Fort William

Fort William, Ont.—Only partially checked by a sudden shift in the wind, a raging forest fire was defying efforts of 200 rangers and firefighters to quench it. It swept over a 15-mile stretch of cut-over timberlands, near Polan, 85 miles west of here.

Some other facts interesting to foreign governments or corporations wishing to sell securities in the republic as set forth in the new law follow:

Truthfulness and adequacy of the information furnished to purchasers of foreign securities under the act are made the direct responsibility of U.S. investment houses floating them.

A clause relative to the financial status of the government or foreign corporation for which funds are intended to be raised must be furnished by the agents in the United States to the federal trade commission.

Just as domestic securities, foreign securities must be registered with the federal trade commission.

### Predicts Stratosphere Flights

New Type Airplanes Will Make This Possible Says Picard

New York.—Professor Auguste Picard, arriving from Europe, said that on the strength of his studies during his 10-mile balloon ascensions, aeroplanes are being built with airtight steel cabins to make possible flights in the stratosphere.

"These planes should go between 450 and 500 miles an hour," he said. "They will have little resistance because the air at that altitude is so light."

"Once the plane reaches such an altitude the pilot can set the course and cross from America to any point in Europe in a few hours."

Picard will go to Chicago, where he will advise preparations for the stratospheric balloon flight of his twin brother, Jean Picard, and Commander Sette of the United States navy.

## Franco-American Differences Adjusted At World Conference

Sir Henry Birkin Was Victim Of Blood Poisoning

London, Eng.—Despite a desperate battle by doctors, Capt. Sir Henry Birkin, 36, a famous racing motorist, died in a London nursing home from the effects of blood poisoning resulting from burns received in the Tripoli Grand Prix in May.

Sir Henry had been critically ill for three weeks, and three blood transfusions were tried.

He had been one of Great Britain's leading drivers since 1927.

Sir Henry Birkin was born July 26, 1896. He succeeded his father to the baronetcy in 1931. It was created in 1905. He served in the war from 1914 to 1918.

London, Eng.—Despite announcement by Thomas A. La Bretton, chairman of the four-power wheat conference that a provisional agreement on 15 per cent. acreage reduction was expected, the situation appeared far from settled.

The Financial Times reported Canada, United States, Argentina and Australia virtually deadlock through Australia's definite refusal to agree to reduce her acreage.

This newspaper said an American expert would approach the principal importing countries immediately and attempt to obtain from them tariff concessions on wheat imports.

The same paper declared considerable hope was held for this plan and that Foreign Commissar Maxim Litvinoff of Russia had pledged his country not to dump wheat on the world market, provided it was given a "square deal" in world markets generally.

The Financial Times' announcement regarding the Australian attitude was believed to mean Stanley Bruce, Commonwealth's Minister at London, had received definite instruction from Canberra not to pledge his country to the acreage-reduction plan.

Mr. Bruce had warned the conference previously that Australia felt acreage curtailment might bring hardship to her many small producers and that reduction of wheat exports might endanger her ability to meet foreign obligations.

However, if importer nations could be brought into the scheme through agreement to increase their takings of wheat through tariff reduction, it was believed some, and perhaps all, of Australia's misgivings would be removed.

It was recalled when Prime Minister R. B. Bennett of Canada and Hon. E. N. Rhodes, Canadian Finance Minister, first broached the proposal of co-operation by importing countries of Great Britain, through Chancellor of the Exchequer Neville Chamberlain, agreed to participate. The United Kingdom is the greatest wheat importer in the world.

It was believed also the Danubian countries and other small producers of the cereal might be drawn into the limitation scheme, conforming to Poland's warning that any reduction plan might be upset by increases in output by smaller, non-participating countries.

## German Jews Need Help

Opinion Of Man Who Investigated Conditions Created By Nazis

New York.—Michael Williams, who investigated conditions in Germany for the American committee of the rights of religious minorities, said in an address that Nazi opposition to Jews "far exceeds any other persecution known in modern times."

"If the Jews are to be rescued, if their position is to be ameliorated in any important degree, it is vital that an international body be set up qualified to speak and act for the Jews of the world."

were adjusted provided the most dramatic incident since the inception of the world economic conference. The meeting was held in a private room in a secluded part of conference headquarters.

Prime Minister Ramsay MacDonald, president of the conference, knew the full import of the meeting. Veteran of innumerable international conferences, he remained alone in an adjoining room, pacing the floor, his hands clenched. Back and forth, back and forth, he walked, his silvered head bent toward the door, listening for the knock which meant that the conference was saved or that it had collapsed.

When Mr. MacDonald was informed his face lit up with joy.

At a press interview Cordell Hull, the United States delegation leader, declared that undue emphasis had been placed on temporary currency stabilization and that the United States deems such action now "unjustly."

**THE COLEMAN JOURNAL**

Published Every Thursday at Coleman, Alberta. H.T. Halliwell, Proprietor  
Membership Canadian Weekly Newspapers Association and Alberta Div. C.W.N.A.

THURSDAY, JUNE 29, 1933

**NOTES AND COMMENTS**

DOMINION DAY, 1933, marks the sixth anniversary of the writer's taking over The Journal, on our arrival in Alberta. A friend wrote a cheerful message at that time congratulating us on commencing business in the first province of Canada, alphabetically speaking. Canada was then on the up-grade towards a speculative boom. The year 1928 was one of the best, financially, in the history of the Crows Nest Pass and the whole of Canada.

THE JOURNAL shared in the general prosperity, as it has in the adverse period following the break in 1929. Drought and grasshoppers, hail and cyclones have taken their toll, repeating the experience of fifteen years or more previously. Depressions have come and gone, and we have risen again to carry on, thankful that health and strength have permitted us to do so.

THE FIRST Dominion Day we spent in Coleman was the diamond jubilee anniversary of Confederation. There was a celebration here thoroughly in keeping with the occasion, promoted by loyal citizens who rejoiced in living under the liberty of Canada and the Maple Leaf.

WE COME to the 66th anniversary. It is a comparatively short time in the life of a nation since Canada became a federation of provinces from the Atlantic to the Pacific, yet with only ten millions of people as its present population, who can gainsay that its progress has been nothing short of marvellous? Such progress could only have been made by a country with great natural wealth, and people of courage and determination. May we prove worthy of those who blazed the trail, who waited not for paternal government aid to help them through difficulties, but saw the job ahead—and did it.

THERE IS ample scope for Coleman citizens to display the qualities we admire in our forefathers. Pride in achievement spurred them on, not playing second fiddle to others. Resolve that as long as you live in a town, that it is the little corner of the earth which by your efforts you can improve; where you may promote happiness and goodwill. In so doing you will gain far greater pleasure than by envying others or imitating them. Join in our national holiday celebration among the people whom you know best, who are your home folks, whose friendship if you are in trouble means more than merely good wishes. Remember that the small town has many advantages over the big city, where you are barely known to your next-door neighbor, and that while you live in Coleman, it is HOME, with the finest surroundings in scenic beauty that Mother Nature can bestow. May you spend a glorious Dominion Day.

**LOCAL AND GENERAL**

Blairmore football team will play a league game here against Coleman on Saturday, July 8. The dance held in the opera house on June 23 under direction of the Adanacs softball team was a success from point of attendance. A small profit was shown. The Lethbridge girls softball team attended the game.

To have driven His Majesty's mails through winter storms and summer heat for 23 years without missing a trip is the record of Matt Brown,

who makes the 60-mile round trip weekly between Spring Point and Pincher.

He was in town on Tuesday, with Mrs. Brown, visiting his daughter, Mrs. T. Holsted. He owns

1600 acres of land in the foothills, and this year, owing to the dry season, finds grass very scarce for grazing his cattle.

A girls softball team from Lethbridge played the Adanacs on Friday evening. Coleman girls were rather nervous, which accounts for the low score against the visitors. After the game they attended the dance in the opera house, the first gathering since the hall has been renovated. The Adanacs will play a return game at Lethbridge.

Not in many moons has Cranbrook had such a celebrated visitor as was here last week in the person of Mrs. Wm. Wrigley, Jr. The car in which she rode was probably the finest to

**S**TONEBORD means Fireproof. Absolute protection plus Insulation against heat or cold. Damp proof and harder, a wall surface that resists soiling and takes all finishes. Will outlast any other wall-board made, costs less. In stock at J. S. D'APPOLONIA.

**NEWSPAPER AD. IS THE BEST**

The Cranbrook Courier states: "Newspapers are the most important advertising medium in any advertising plan today. The newspaper is best because the newspaper is on the ground—it touches intimately the consumer—it reaches him or her frequently, it offers control of the advertising message at the point of sale. Newspapers have the full confidence of the people, because the newspaper has become more than the mere recorder of happenings. Newspapers have important features that appeal to women, to children, to men."

It takes years to build a successful newspaper circulation, one with a complete coverage of its place of publication and the trading area it serves."

Newspapers of interest are eagerly read, not left lying on post-office floors or front gardens where delivery boys drop bills. An ad in the local weekly newspaper is bound to command attention, and predominates over all other forms in attracting public attention with the printed word.

J. Griffiths, Walter Nelson, E. C. Clark and Henry Eysacker motored to Calgary on June 24 to attend the grand lodge meeting of the Knights of Pythias. The principal speaker was Supreme Chancellor Dunn, of Cleveland, Ohio. Delegates from all parts of Alberta attended.

**United Church Notes**

The usual services morning and evening will be held next Sunday, July 2. At the morning service the congregation will be glad to welcome back to Coleman, one of their own boys, Rev. Fred Antrobus, of Peace River Crossing. Mr. and Mrs. Antrobus and child are on a visit to their parents in Coleman. Mr. Antrobus is in charge of the Baptist church in the northland and will be the preacher at St. Paul's Sunday morning.

At the evening service a patriotic sermon will be preached by the minister and appropriate hymns will be sung in celebration of Dominion Day. You are most cordially invited to be present.

**ADVERTISING**

The world's great need is courage. Show yours by advertising. There is business today, but advertising must ask for it.

**ST. ALBAN'S CHURCH, COLEMAN**

Next Sunday, the third after Trinity, 11 a.m. Holy Communion.

The Sunday school will be discontinued until the first Sunday in September.

The annual diocesan summer school will be held in St. Paul's residential school, Cardston, from July 3 to July 8 inclusive.

Coleman has so many softball teams it is almost impossible to keep track of them. The Merchants is the latest team to be organized. Joe Emerson, one-time star football player, has taken to softball, and is beginning to feel so sprightly that he believes he will soon be able to play baseball.

Portable Remington typewriters are sold on easy terms. The reputation of these machines is beyond dispute. The terms are easy. Enquire at The Journal office.

# Sees World Wheat Surplus And Believes Curtailment Of Production Is Only Solution

In the April issue of Canadian Business, writing under the pen-name of John Marquis, an authority on the wheat situation had an article in which, after analysing the situation as he saw it, he reached the conclusion that no real evidence exists of a world surplus of wheat. In the current issue of this organ of the Canadian Chamber of Commerce, John I. McFarland, general manager of the Canadian Co-Operative Producers Limited, makes a spirited reply, in which he questions the basis of this conclusion, puts forth figures to indicate that there is a surplus and argues the need of acreage reduction.

Mr. McFarland states that statistics show that the visible supplies of wheat had commenced to accumulate before the unusually good crop of 1928 and since its disposal they have continued to accumulate. He quotes the International Institute at Rome to the effect that wheat stocks will experience a further appreciable increase during the present season, that exportable stocks will have risen from 665 millions on August 1 last year, to 650 millions by next August. Total international trade for this year, he states, is estimated to be somewhere between 630 and 664 million bushels, so that the exportable carryover surplus really represents 100 per cent. of the total international trade for a year. The surplus, he asserts, "becomes a quantity of paramount importance as a price making factor." Based on the present world's acreage and with average crops, he states, the world's surplus will continue to increase.

As regards the position of Canada, Mr. McFarland sets forth that before the war this country supplied about 13 per cent. of the world's international trade in wheat. Since then Canada has increased her acreage greatly. If this country continues its present acreage and reaps average yields per acre, it will appear necessary, says this authority, that Canada must secure very close to 50 per cent. of the world's trade to dispose of its crops. Does anyone believe, he inquires, that other countries are going to leave to Canada the privilege of supplying this produce?

What is the solution for the conditions described? According to Mr. McFarland, the only method by which there may be any permanent advance in prices is by a world-wide reduction in acreage. In such a movement, he thinks, Canada should be a leader because in the past twenty years she has increased her acreage by a much greater percentage than any other exporting country. He goes on:

"The Laws of Nature of the Acts of Providence might conceivably reduce production on this over-extented acreage, but such reduction can only be of a temporary nature, because after all those laws, over a period of years, will make their averages. Therefore, it appears that there is only one way of permanently correcting the unsound conditions and that is by the actual reduction in acreage."

Mr. McFarland buttresses his contention with the statement that the United States has fed an unusually large quantity of wheat to animals during the last three years—a quantity sufficient for a year's world supply. He points to this as an answer to the people who say that there is no over-production and that the problem is only one of underconsumption.

The viewpoint thus set out is the viewpoint of a large element in the West which favors agreement for control of production and control of distribution.

## Rail-Bus Is Speedy

The "rail-bus," a new type of vehicle with a 100-horsepower steam engine, has just been placed on the Brighton-Devil's Dyke line of the Southern Railway of England. It will accommodate 44 passengers, and in test runs has speeded over 60 miles an hour.

"What is the best thing to do when suddenly faced by an infarcted bull?" asks a correspondent about fifteen miles an hour.

W. N. U. 2000

## Canadian Mosquitoes

### About Sixty Species Of This Pest Found In Canada

There are about sixty species of mosquitoes in Canada, many of which feed on the blood of man. Although the majority of them, particularly the kind known as Aedes are most troublesome in field and woodland, in certain seasons, as at present, as the result mainly of non-control, they often cause considerable annoyance indoors as well. Their attacks are most noticeable at dusk and in warm, dull, humid weather. In autumn and winter, also, complaints are frequently received of the presence of numbers of mosquitoes in cellars and basements. These mosquitoes are the hibernating females of the genera Culex and Anopheles which pass the winter as winged adults in protected situations. Attacks from them are rare. However, in many parts of Eastern Canada, the cosmopolitan house mosquito, known scientifically as Culex Pipiens, is now well established, especially in towns and cities, and in one large city has become a public nuisance. This species is found not far from dwellings which it enters freely, biting particularly at night. How householders and others can combat the mosquito nuisance is fully explained in "Mosquito Control in Canada," a pamphlet issued on request by the Dominion Department of Agriculture.

## World's Largest Zinc Mine

### Sullivan Mine At Kimberley, B.C. Is The Largest Producer

The Sullivan mine at Kimberley, British Columbia, is the world's largest producer of zinc ore and one of the leading producers of the ores of lead and silver. This mine has produced a grand total of 1,596,155 tons of lead, 1,261,475 tons of zinc, and 55,184,466 ounces of silver since it began to operate in 1900 up to the end of 1932. Last year, 1,441,045 tons of lead-zinc-silver ore were milled, as compared with 1,614,740 tons in 1931. The Sullivan is the source of nearly all the annual lead output for Canada, and of over 80 per cent. of the zinc production. Since 1925 it has held supremacy in the production of silver.

Fort Steele mining division, in which the Sullivan mine is located, has several other silver-led and silver-led-zinc properties, which in past years have made important contributions to the output. Many years ago this district was an important producer of placer gold, and interest in the placer prospects are again active, due to the present premium on gold. There are also in the Fort Steele area a variety of non-metallic minerals, such as gypsum and crystalline rock magnesite.

## No More Constantinople

### City Now Called Istanbul and Is Not Turkish Capital

The first two things to remember about Constantinople nowadays is that it is not the capital of Turkey and that it is not called Constantinople. The capital is Ankara where the President-dictator, Mustapha Kemel, lives on his estate "Pinehill," and Constantinople is called Istanbul. It is a city with a million inhabitants and about fifty thousand starving dogs, but some time ago they were taken off to a deserted island with no food or water, so that they all ate each other until the survivor died of thirst.

## One Great Advantage

School days being once more over there will be many boys and girls with nothing to do and no place to go. Here is where the farm presents advantages over city life. The farm boy or girl can be given some responsibility or some task that will be useful to them and not disadvantageous or costly to the parents. Farm youth do not have to spend their vacation days in idleness—Father's Advocate.

## Used Discretion

When a herd of 36 elephants paid attention to the furious blowing of a locomotive whistle, as they leisurely crossed a railway track between Bulawayo and Gwelo, Africa, the engineer had to stop his train until they were out of the way.

To utilize surplus sugar, Czechoslovakia is converting it, mixed with bran and other ingredients, into fodder for horses, cattle and pigs.

## Winnipeg Newspaper Union

## GOOD LOOKING HOME WEAR HELPS IMMENSELY—MAKES KITCHEN CHORES EASY

Every woman knows she can't have too many home ensembles that won't fit and tub and always come up smelling.

And today's model is just lovely. The dress is suitable for the kitchen, den, porch, marketing, etc. And incidentally, it's dead slimming to the heavier build. The diagonal hip seeming to the bust.

The dress is dark blue and white dotted. The apron is white dotted, which is used for the dress trim.

And isn't the one-piece apron attractive? And it won't slip off the shoulders either, for the suspenders are useful besides being attractive.

Design No. 910 includes the dress and the apron in sizes 16, 18, 20, 22, 24, 26, 28, 30, 32, 34, 36 and 38 inches in length, 18 inches in width, 33-inch material for dress with 1½ yards of 3½-inch material for apron and dress collar.

Price of pattern 20 cents in stamp or coin (coin is preferred). Wrap coin carefully.

## Distinguished Canadian Artist

### Wild Flowers Lived Under Brush Of Late Robert Holmes

Three years ago Robert Holmes, artist, died. Alice Wetherell writes of the painter of wild flowers in *The Challenger*: "One day in 1899 a young milliner of the Kawartha Lakes district, gave a trimming bonnet with artificial flowers, and settled down to housekeeping with her young husband in Cannington, Ontario. She planted seeds and bulbs and her garden became the best in the village. Not much wonder that we Robert imbibed love of beauty. It was therefore not so strange that when he drew pictures for the first number of the Art Student's league calendar, he should choose as his subject the back doorway to that house, his mother inside washing dishes, and outside directly in her line of vision, the grapevine, the lilies and poppies massed against the walls.

"Not even remarkable that the lad, brought up with such a background, should finally become Canada's most distinguished painter of flowers, and the greatest painter in America of wild flowers in their native setting.

"The fireweed, loose stripe orchid and Indian pipe, in Holmes' water colors, are never stiff posies, but always seem to be growing in the woodland haunts where he found them. He alone seemed to have the power to put this subtle sense of life into what are usually regarded as 'still-life' pictures. Yet it took weeks of work to picture that spirit that made you smell the perfume and feel the breeze as he did.

"He was a student of the Toronto Art Society and of the Royal College of art in London. He chose Canadian wood flowers for his design classes as a peculiarly native Canadian motif on which to base their work. With the words 'flowers on his lips he died, and according to his wish is buried in a little lot beside the path where he so often wandered as a boy."

The dress is dark blue and white dotted. The apron is white dotted, which is used for the dress trim.

And isn't the one-piece apron attractive? And it won't slip off the shoulders either, for the suspenders are useful besides being attractive.

Design No. 910 includes the dress and the apron in sizes 16, 18, 20, 22, 24, 26, 28, 30, 32, 34, 36 and 38 inches in length, 18 inches in width, 33-inch material for dress with 1½ yards of 3½-inch material for apron and dress collar.

## Want African Colony

### Germany Seeks Room For Expansion And Means To Pay Debts

Germany is asking the world for an African colonial empire.

A memorandum prepared by Dr. Alfred Hugenberg, German minister of economics, for the economic committee of the world conference, said there were two possible ways of increasing Germany's capacity to meet her international debts—first, by giving her an African empire where large public works schemes could be carried through; or second, by opening other new territories "to this people which has not enough space in which to live."

## Money From Trees

Australia, strange as it may seem, is teaching its young people that money grows on trees. Under adult guidance, state school children of Victoria have set out 4,000 acres of saplings that will be worth \$3,000,000 on maturity. Profits from the sale of bark and timber will be used to provide scholarships, libraries, radio and sports materials—Christian Science Monitor.

## AFTER THE RECORD HOP FROM SPAIN

Showing little effects of the strain of their hazardous flight. Captain Mariano Berberan (left) and Lieut. Joaquin Collar, Spanish Army flier, are shown at Camaguey, Cuba, on the completion of their record flight from Seville, Spain, in the plane "Cuatro Vientos" (top). Their route took them over 4,500 miles of ocean.

### Diamond Jubilee Of The Royal Canadian Mounted Police

## Price Of High Living

### Famed Embassy Club Cat Killed By Rich Food

Jackson the "High Life" cat, the most famous cat in Mayfair, and perhaps in the world, is dead.

Felix, the phantom of the movies, could not hold a candle to Jackson. He was an aristocrat. Kings paid court to him, but he seldom deigned to notice them.

Jackson was the mascot of the famous Embassy Club in London's Bond Street. He figured in novels, caricatures and innumerable gossip columns.

Now like other martyrs to the cause of High Life, he died of acute indigestion at the comparatively early age of eight.

It is impossible to estimate how much smoked salmon, foie gras, leg of chicken and caviare he ate in the eight years he associated with the elite who passed through the portals of the Embassy Club.

Guests after distinguished guests tried to pay court to him with tidbits. Often he turned disdainfully away, but not often enough. It got him in the end.

Lambent green eyes, arched back, tall stiff as a ramrod, Jackson walked aloof. In a sudden fancy he would sit on the knee of a millionaire or the lap of a slim star, and then no one would move him. Sometimes he would jump through a human hoop formed by a water's arms, his only parlor trick, but only on rare occasions.

Jackson Junior, a small black kitten, now reigns in his stead. At his first appearance, he tasted caviare, blue trout and quail, and he found them all good, far too good for any kitten which hopes to live past the age of eight. If only his absent parent could warn him of the perils of rich living!—Jackson the "High Life."

## Coral Not a Rock

### Every Inch Is Built By Tiny Sea Animal

Coral is not a rock, it is made of skeletons. It is really an animal something like a sea-anemone jelly-like and soft, and of olive brown color. It has many tentacles round its mouth, and when it has caught its food it floats it through its body on a stream of water, which it is continually sucking in. This sea-water contains lime and somehow the coral animal draws the lime from the water and uses it to build a tiny platform for it to rest on. Gradually it makes a home for itself out of lime, and in that it lives till it dies. Then the next coral animal comes along and builds its lime shell upon the old one, and so on. After thousands of years billions of these creatures will have made a huge mass of lime, which come above the surface of the sea and make a coral island. The Great Barrier Reef, off Australia, is hundreds of miles long, yet every inch of it was made by these tiny creatures.

## Leaves Nothing To Chance

### Electricity Keeps Tab On Crowds At Chicago Fair

Electricity keeps century of progress officials at Chicago informed as to just what the number of persons inside the grounds is at any time. Turnstiles at the various entrances are equipped with counting and recording devices with a central dial in the comptroller's office. A glance at the dial tells how many persons have entered the grounds, how many left and what entrances and exits were used. The information is used in distribution of guards and change at entrances; to notify transportation companies when there is a rush from the grounds and at what exits, and to keep concessionaries informed of the size of the crowds so they will not run out of supplies.

## Needs a Pension

Hadjii Bey, a Turk, has 43 children—38 boys and five girls. This is believed to be a world record. The Sultan used to give Hadjii a yearly bounty, but this has been stopped. Hadjii has now applied to Mustapha Kemal Pasha for a pension.

## British Railway Passenger Cars

have sufficient seats to accommodate one in one-twentieth of the population.

A pedestrian is defined by an exchange as a "married man who has a car and a couple of sons."

## This Year Is The Diamond Jubilee of the Royal Canadian Mounted Police

This year is the diamond jubilee of the Royal Canadian Mounted Police, formerly the Royal North West Mounted Police. This famous force was established in 1873, following the acquisition of the western prairies in 1870 by the Dominion of Canada. The several Indian tribes at that time were powerful and prosperous, but were being demoralized by liquor sellers and by tribal warfare of a nature to discourage settlement by white persons.

The Force, only 300 strong at the outset, marched in 1874 right across the prairies from the Red River in Manitoba to the Rocky Mountains, the entire march being more than 2,000 miles and through country which in part was then unknown.

The Indians were so impressed that a series of treaties were concluded, and the Government was enabled to assume effective control of the Indians.

In addition to discharging police duties and undertaking much executive work, such as guarding against prairie fires in the early days, visiting lonely settlers, and discharging many other responsibilities, the Force had a share of military duties. The original march across the prairies was a military task, performed in a military manner. During the Riel Rebellion in Western Canada in 1885 the Force bore an active part; a number of officers and men were sent to the South African War, two squadrons for service in France and Belgium and one in Siberia during the Great War were furnished.

The force of 2,500 officers and men of the Royal Canadian Mounted Police is now distributed in the way best suited to perform its many duties. It is found along the International Boundary, where it aids in protecting the revenue and preventing the entrance into Canada of undesirable articles. It is located on or in the vicinity of Indian Reserves to maintain good order, and to aid in the enforcement of laws. It occupies many lonely posts in the Northwest Territories and the Yukon, and along the Arctic and Hudson Bay Coasts. It is found in centres of population and at any point where there is an indication of trouble arising likely to affect the peace and well-being of the country. These officers and men stand for constitutional order and government. For 60 years they have been the guardians of the law and administrators of justice throughout the Dominion of Canada.

## Historical Garden Roses

### Origin Of Beautiful Hybrid Perpetual Roses In Canada

At the end of the eighteenth century the China rose with its habit of continuous bloom was brought to Europe, says the Dominion Horticulturalist, Dr. Macoun, in discussing the probable origin of the beautiful hybrid perpetual roses in Canada. Before very long hybrids of the China rose with French and Provence roses were raised. They were called hybrid Chinese, but took after their European parents in that they flowered only once in the season. These hybrids and the damask roses were then crossed, and Rose du Roi, a damask perpetual, was introduced about 1819. This rose was called perpetual because it had a second blooming season. Six years later Gloire de Rossmes appeared, followed by rapid improvement of this class, and in the fifties such garden favorites as General Jacquemont and Jules Margotin were introduced. In Canada many of the hybrid perpetuals bloom once only in the season.

## Wrapping and All

The general practice in telephones has its disadvantages. Take the case of the near-sighted man who ordered a ham sandwich at a lunch counter for example:

"Was that sandwich quite fresh that you sold me?" he asked.

"Quite, sir," replied the lunch counter attendant. "Each one is wrapped in transparent, airtight paper."

"Gosh!" said the customer. "I wish I'd known that."

## Bit Of A Puzzler

"I'm glad you're so impressed, dear, by these explanations I've been making about banking and economics," remarked the young husband.

"Yes, darling. It seems wonderful that anybody could know as much as you do about money without having any of it."

## WORLD HAPPENINGS BRIEFLY TOLD

The 50,000 employees of the General Electric Company in its plants in various parts of the United States will receive a five per cent increase in wages effective July 1.

After serving as organist of Christ Church, Highbury, for 63 years, and breaking all records for length of service as organist in England, Miss M. Cooper, aged 83, has retired.

Ko Iahli has been appointed Japanese consul for western Canada with headquarters in Vancouver and will arrive this month. He succeeds T. Hashiy, who returned to Tokyo, Japan, seven months ago.

Clara Zetkin, noted German Feminist, died unexpectedly at a sanatorium at Archangelskoye, near Moscow. In another month she would have been 76 years old.

Services of an internationally known detective agency will be used by the Toronto library board to recover books loaned and not returned. The agency will receive 25 cents for every book it retrieves.

The British Government has announced that the King has approved the appointment of Lieut.-Col. P. R. Lauder to be assistant commissioner of the Metropolitan Police, succeeding Major Maurice Tomlin, who has been retired on pension.

Princess and Florence Colliers of the Nova Scotia Steel and Coal Company were hoisting coal for the first time since the miners refused two months ago to work under wage reductions. They accepted a compromise wage scale.

Vancouver offices of the United States Department of Commerce have been closed. Greatly reduced appropriations for the commerce department are responsible. The only commerce office now left open is in Ottawa.

Agricultural department officials press re-opening of the market for Canadian cattle in New York state, practically closed since Oct. 1, 1930, when an order went into effect requiring cattle imported into that state be certified free from Bang's disease.

The death of Senator Paradise brings the list of senatorial vacancies to nine, the largest number of unfilled seats in the red chamber for some considerable time; Saskatchewan, Ontario, New Brunswick and Quebec are each short two senators, while Nova Scotia has one appointment to make.

### Adventure In North

Boys From Honolulu On Scientific Quest In Alaska

Ten boys from Honolulu, ranging in ages from 14 years to 17 years, have sailed from Vancouver for a summer of scientific research and adventure in northern Canada and Alaska.

They will proceed to Skagway and go into Whitehorse where they will take boats for a run down the Yukon River to Dawson, Fort Yukon and Tanana. They will rough it until August, crossing an estimated total of 1,600 miles. They will collect botanical specimens for the University of California and do some prospecting.

Bayne Beauchamp is in charge of the expedition.

### Auto Production

May Production in United States Highest in 22 Months

May production of motor vehicles by member companies of the United States Automobile Chamber of Commerce was the highest in 22 months, according to a preliminary report.

Output totalled 172,883 units, a gain of 23 per cent over April and 51 per cent over May, 1932. Production for the first five months of this year, on the basis of this estimate, amounted to 605,739 units as against 584,505 in the same 1932 period.

The organization includes all major producers except the Ford Company.

### For Canadian Cattle Trade

At the request of the Department of Trade and Commerce the Dominion Steamship Line has specially equipped the steamer "Nevisian" for the cattle trade. The vessel, first of her line to engage in the Canadian trade for over eight years, sailed from Montreal with 535 head of Canadian cattle for Cardiff together with 130,000 bushels of Canadian grain and a general cargo.

Many of London's 32,000 factories are resuming operations.

### A Strange Assignment

Dr. O'Neill Returns From Africa Where He Exhibited For the Chicago Fair

Returning from what is perhaps one of the strangest assignments ever given to a man, Dr. Owen R. O'Neill, of Chicago, is in Montreal on the Cunard liner "Tajmox." Dr. O'Neill has been acting on behalf of the Chicago World Fair Authorities and has just completed a tour of Africa, from Egypt to the Cape in search of interesting types of various tribesmen throughout the Dark Continent.

He has also collected a large number of exhibits of examples of their primitive art and workmanship. After some months of ceaseless travel in Africa, Dr. O'Neill has at last reached an interval of rest. He is now in the land of the natives, the collection of which he has probably ever been got together for exhibition purposes. The collection of twenty-two native tribesmen, with the exhibition material are coming on the Cunard liner "Alania." The natives are travelling in special third class accommodation and are expected to arrive in their native dress when they will probably create something of a furor.

Dr. O'Neill is a medical practitioner by profession, and after his experience as an explorer in Africa he was engaged by the Chicago World Fair to collect material for the exhibit on Africa. The effort was made so successfully that he was soon ex- plained in an interview on arrival. And he did not have enough time to make his collection of individuals complete. He found that the British Government and the Belgian Government whose rule extends over many sections of central Africa where are located the most interesting tribes, refused permission to allow him to collect specimens for exhibition purposes. There was no such objection, however, from the French Government, and Dr. O'Neill was able to obtain a large variety of specimens from the tribes in the Congo, Portuguese Africa, and other sections in Central Africa.

Dr. O'Neill's original trip was to London, England, where he had come by steamship, and he made the Imperial Airways trip direct to Paris with the customary stops at places like Bulawayo and Rhodesia, and after a successful flight to Addis Ababa, capital of Abyssinia. Every facility was given him to obtain native works of art before he proceeded south through Ceylon.

The tallest passenger on the "Alania" was certainly B. Greene, who is making a rush trip to Canada. Mr. Greene's 8 feet eight inches tall and claims that he is the tallest member of his family.

The berth in his cabin, made for passengers of more modest dimensions, had to be altered to accommodate his Herculean frame.

Mr. Greene comes of a famous family of tall men and claims he can trace his ancestry back two or three centuries. Although born in Brazil, he served in Russia, in the Diplomatic Service in Russia and is now the owner of a garage in England.

### Recipes For This Week

(By Betty Barclay)

#### HUNGARIAN CHOCOLATE FROSTING

(Using egg yolks)

2 squares unsweetened chocolate, cut in pieces.

1½ tablespoons hot water.

½ cup confectioners' sugar.

2 egg yolks, well beaten.

¾ cup butter, washed in cold water to remove salt.

Melt chocolate in double boiler, add hot water, and blend. Add sugar and egg yolks, and beat well. Remove from fire and allow mixture to stand over hot water 3 minutes or until slightly thickened, stirring constantly. Cool quickly to lukewarm. Add butter, a tablespoon at a time, blending after each addition. Makes enough frosting to cover top and sides of 8 x 8 x 2-inch cake, or tops of 8 ½ x 9-inch layers.

Note: This is a small recipe. Double the recipe for enough frosting to spread between layers and on top and sides of three 9-inch layers.

#### HAM LOAF

6 hard boiled eggs

2 cups cooked ham, chopped fine.

1 cup milk.

1 tablespoon flour.

1 tablespoon butter.

1 teaspoon Worcestershire sauce.

1 teaspoon sugar.

1 teaspoon mixed mustard.

Salt and pepper.

Make a white sauce of the flour, butter and milk. Add seasonings. Ar-

range a layer of the sliced, hard boiled eggs in the bottom of a baking pan. Pour on a little of the sauce. Add a layer of the ham. Cover with sauce. Continue alternating layers until all is done. Cover top with well buttered bread crumbs. Bake thirty minutes in a moderate oven.

A girl can always tell when a man is in love with her by the way he looks at her when she isn't looking.

Egypt now considers that its onion crop is its second most pro-

### A QUAIN PRETTY FROCK IS THIS WITH ITS BOWS—PUFFED SLEEVES

Isn't it attractive? The raglan shoulders and puffed sleeves are so youthful and smart. And the plaited belt adds a touch of whimsy.

Carrot-red crinkly crepe silk is as smart as can be as the original.

A crepe silk print in pin dot in blue and white is well suited with white stripes used for the sleeves and bows worn with a white leather belt.

Style No. 316 is designed in sizes 8, 10, 12 and 14 years. Size 8 requires 2 ½ yards of 38-inch material.

Price of pattern 20 cents in stamps or coin (coin is preferred). Wrap coin carefully.

Every year British milk suppliers need 65,000,000 new milk bottles to replace losses due to breakage and theft.

Increased shingle production means more activity in the woods.

An Amazing Machine

An amazing machine was demonstrated in Aberdeen, for filleting fish of any size. During the demonstration the machine took charge of a batch of small haddock, chopped off their heads, stripped off their fins, cleaned them, shaped them, and removed their bones without crushing or damaging them. It delivered them ready for smoking or packing at the rate of thirty fish per minute.

Shingle production in the lower Fraser Valley this year is expected to reach 1,200,000,000 pieces of a value of \$2,000,000 against 770,000,000 pieces in 1932.

Increased shingle production means more activity in the woods.

Shingle production in the lower

Fraser Valley this year is expected to reach 1,200,000,000 pieces of a value of \$2,000,000 against 770,000,000 pieces in 1932.

Increased shingle production means more activity in the woods.

An Amazing Machine

An amazing machine was demonstrated in Aberdeen, for filleting fish of any size. During the demonstration

the machine took charge of a batch of small haddock, chopped off their heads, stripped off their fins, cleaned them, shaped them, and removed their bones without crushing or damaging them. It delivered them ready for smoking or packing at the rate of thirty fish per minute.

## Removal Is Regretted

Edison's Home One More Historical Belle Canada Has Lost

All credit to Henry Ford, whose interest in antiques is proverbial, for making possible the restoration and preservation of the boyhood home at Vienna, Ont., of the great electrical wizard, Thomas A. Edison, but his accompanying efforts to move the lad rather shrewdly reflected by the community in which it stands, to his historical settlement at Dearborn, Mich., is to be regretted.

Until official action was taken, people from the United States made such a business of transferring Indian totem poles from the coastline of British Columbia to museums and similar institutions across the border that the supply was visibly depleted and these interesting specimens lying along the Pacific coast were in danger of losing their chief attractions. People who realized the value of these totem poles from the standpoint of history and tourist revenues took steps to bring this "habitant" in its traditional atmosphere to receive company.

### Keeping Old World Charm

Quebec Objects To American Flavor In French Canada

The commemorative jargon of contemporary life in the United States is not to be allowed to sully the scenery, or contaminate the language, of the Province of Quebec, in the provincial government has its way.

Suffering until recently from an invasion of its scenic highways by the billboard menace—which, however, has been crushed by legislative action

Quebec now proposes to see what can be done about incongruities in its quaint "French Canadian" as "Lindy's House," the "American Tea Room," "Roosevelt Inn" and "Chez It."

It's not that Quebec, nor its people are giving vent to any feeling of anti-Americanism. Far from that. It's only, as the Hon. J. E. Perrault, Minister of Highways of the province, points out, that French Canada should remain French Canada, and prevent the intrusion of all influences which tend to destroy its old world charm.

That this new Gallicizing movement, launched by various civic and patriotic bodies and sponsored by the provincial government with a view to encouraging American tourist traffic, is gaining momentum, is attested by the fact that the campaign was the subject of debate in the legislative assembly only the other day.

Meantime, taking its cue from the highway minister, the association of Quebec resort hotels is taking an active part in the movement. It is offering the hotel trade plans which revive features modern Quebec tavern keepers never knew, and set the "habitants" in their traditional atmosphere to receive company.

### Origin Of Word "News"

Early Periodicals Used Letters To Indicate Points Of Compass

The first periodicals carrying information of the doings of the world were small, one sheet affairs similar to the advertising doggers thrown around the streets by small merchants who had not learned that the only advertising worth paying for is in their local daily papers.

These periodicals carried at the head of the first column a weather vane, its four letters indicating the four points of the compass to assure the readers that the information contained therein came from as widely scattered points.

In time the periodicals became crowded for space, and instead of printing the weather vane, they printed the four letters N. E., W. S., later, the periods between the letters were dropped and there appeared at the mast head of each periodical the letters NEWS, and into the world a word was born—the word "news."

The periodicals were called news-papers, and in time anything which was news was news!—Kiwanis Magazine.

### B.C. May Have Steel Industry

Tentative Negotiations Under Way

\* With Government Is Report

It is reported in legislative circles at Victoria that tentative negotiations are under way looking to the establishment of a steel industry in British Columbia, probably on Vancouver Island.

If the British Columbia government would implement its Iron Bound Act and pay a bounty on all iron produced, those interested are prepared to establish an industry employing from 1,000 to 2,000 men, it is stated. From Taxada Island, in the Gulf of Georgia, would be used.

### Not Controlled By Brains

"The human brain is wonderful," remarks The Ottawa Journal. "The instant it is informed of a grade crossing ahead, it sends a message down to the feet to step on the accelerator." Where The Journal goes wrong, according to the Border Cities Star, is in presuming that feel which step on accelerators at grade crossings are in any way controlled, or directed by brains.

Cosmic rays, flashing toward the earth with tremendous energy of more than 500,000,000 volts, have been made to photograph themselves by means of a new invention.

### TIRED AND IRRITABLE?

Take Lydia E. Pinkham's Vegetable Compound

It steadies the nerves and helps to build up the body. You sleep better... sleep better... look better. Life will seem worth living again. Remember that 98 out of 100 women say, "It helps me." Let it help you too. Liquid or tablet form, as you prefer.

W. N. U. 2000.

### Some Unusual Gadgets

Students' Display At Massachusetts Technical School Is Interesting

A machine that measures the shine on a girl's nose, another that puts a mouse "on the spot" when it passes an electro-magnetic wave, are but two of the intricacies displayed at Massachusetts Technology to visitors.

Other displays show electrons travelling 300 millions of miles an hour; cosmic rays being trapped and a contraption which measures vocal and instrumental music by light flashes of varying intensity.

A model railroad, which operates without an operator, and enormous testing machines, which break big timber as if it matched sticks, are other attractions of the marvelous scientific "weds show" presented at "open house."

The rodent eradicator is the most unusual. It kills Mr. Mouse with an electric eye, which never sleeps. As soon as he leaves his hole, he interrupts a light beam playing upon a photo-electric cell. The cell operates a relay which in turn operates an electric magnet attached to the trigger of a tiny cannon.

In keeping with the times, a string is attached to the bullet which can be used indefinitely. Tech students point out volubly they have been experimenting with artificial mice.

The machine cost the students \$25 each to build.

### Veteran Globe-Trotter

Cleveland Man At Eighty-Six Starts On Another Trip

D. Jay Colver has packed his old kit bag and started off on another jaunt, this time to celebrate his 42nd wedding anniversary.

Colver is 86. He is said to be the most widely travelled man in the world. He has departed from his home in Cleveland, Ohio, exactly 79 times for foreign parts, and has covered something like 3,000,000 miles.

Business intercessor with travel according to Colver, so he got rid of his business a few years ago to concentrate upon the call of wanderlust. "I got settled down about a year ago, but then I got to ailing and decided a trip would help me out," he said.

Consequently, Mr. and Mrs. Colver sailed together to celebrate their wedding anniversary. Offhand, Colver recalls the following jaunts: six times around the world; twice around Africa; seven times around South America; three times to Japan and China; 30 times to Florida and Cuba, and 31 trips to the Pacific Coast.

### Rapidly Gaining Ground

Younger Generation In Most Countries Interested In English Language

The English language is rapidly gaining ground and will be firmly established as the universal language in one or two more generations according to an article in the Swedish periodical "International Co-operation," the organ of the information bureau for peace and international co-operation in Stockholm.

"There is no doubt that amongst the younger generation in most countries there is a strongly growing interest in English and that the ability to speak the language will soon be spread to an extent that only 20 years ago we were unable to realize," the article begins. The author points out that as a native language English is used by roughly 220,000,000 people or about one-ninth of the world's population, spread all over the globe.

### Some Queer Names

A traveller whose curiosity led him to analyze the names in the timetables published by the Canadian National Railways, comments on the oddness of some of the names which appear in it. Among them are Charcoal, Petrel, Glass, Jelly, Water Tank, Soft Comfort, Paradise Hill, and Ha Ha Point. The shortest one-syllable names include Ems and Ops.

Shipments of Canadian raccoons which was sent to Finland some time ago for breeding purposes is reported to be flourishing. Now all Finland needs is a college.

In the second quarter of this year construction was started in 1,607 buildings in cities of Poland.

Every man who says that marriage is a success praises both his wife and himself.

Australia was the largest purchaser of British Columbia lumber last year.

"Some men are born great, some achieve greatness, and others just grate on you."

### Effect Of Depression

Not Very Soothing To The Nerves In The Opinion Of Some

A New York doctor says the depression saved the world from a nervous breakdown. We were traveling too fast, he thinks, financially and otherwise, and could not have stood the strain. In proof he submits that the mental hospitals filled up during the boom years. He expects fewer patients in years to come.

Authority is always to be respected and questioned with due reserve. Yet one would like the expert to explain the suicide epidemic that has swept the continent in the last three years. People do not take their own lives when they are in a state of tranquility.

The doctor doubtless knows whereof he speaks when he says the boom years were hard on the nerves. He is on questionable ground when he suggests the depression has ushered us into less distracting conditions. The facts, as recorded in the daily record of self-inflicted tragedy, seem to point in the other direction.

The jigsaw puzzle has given way to the pastime of hunting among the debris of deflation for compensatory blessings. Unless it is a blessing that life is less attractive than it was, nobody has yet found them.

### Gay Colors For Bridges

Structures Of Future Will Be Artistic and Colorful

Bridges of the future will excel anything yet known in beauty and size, single length and dull bridge paints of forbidding battleship gray will give way to gay, bright colors, Dr. D. B. Steinman, New York consulting engineer, redacted in an address at Pittsburgh.

"New metals are being tried," he said. "Aluminum will be more extensively employed in future bridge erection. Bridge paints of dull black, and cold, forbidding battleship gray will give way to colors—soft blue-green to match the landscape, relieved by bright stainless steel. New lines will express the functions of stress-bearing parts. The old cross-bracing principles are being eliminated."

### THE RHYMING OPTIMIST

By Alice Micheline

#### BEADS

Beads of every color,  
Gay as wild birds' wings;  
Why do women prize these  
Half-barbaric things?

Beads as blue as heaven,  
Beads as white as milk,  
Slowly rising, fainting—  
Over bracelets like silk.

Beads of jet and amber,  
Coral pearl and jade;  
Beads to suit each minnese  
Of a changeable maid!

Beads for love and laughter,  
Beads for grief and tears,  
Beads to mark the passage  
Of a woman's years!

#### STEPS TO DELINQUENCY

Seven Stages Are Set Forth By Probation Officer

John E. Smith, chief probation officer of Middlesex County Superior Court, Massachusetts, lists seven steps in the development of the average youth delinquent's career. The steps are:

1.—Develops inferiority complex at school because teacher fails to sense his problems as subnormal child.  
2.—Becomes truant and associates with "bad companions."  
3.—Takes to petty pilfering.  
4.—Begins breaking and entering.  
5.—Steals automobiles.  
6.—Becomes racketeer, or bootlegger, and carries gun.  
7.—Turns to major crimes, such as holdups.

The rose gardens of the Central Experimental Farm, Ottawa, contain over 500 varieties.

The United States may not recover by leaps and bounds—nor by hops—Brandon Sun.

### YOUR LIVER'S MAKING YOU FEEL OUT OF SORTS

Wake up your Liver Bile

—No Calmed needed

When you feel blue, depressed, sour on the world, you're not alone. Millions of people feel the same way every day. Turn your liver into a healthy, happy organ.

Take Carter's Little Liver Pills. They're the best blue, safe, pure vegetable, Bore. Ask for them by name. Recommended 25¢ a day.

## ONLY FIRESTONE

gives you all these  
**EXTRA VALUES**

NEVER before have so many people been changing over to Firestone Tires. They know that they can buy Firestones with full confidence of getting the most mileage for the least amount of money, for only in Firestone tires can you get all these extra values—that give 25 to 40% longer tire life—at no extra cost.

In these days when you have to make one dollar do the work of two, be sure you get the most value for your money. See the nearest Firestone Dealer today. Let him equip your car with the strongest, safest and most economical of tires.

### More Than Exercise

Lazily Walk Will Do Much Toward Clearing Brain

Walking is one of the best possible exercises. The good effects of a walk early mornings, when you are fresh, is more than mental. English people understand the value of walking. Americans have always been too hurried. Walking without rushing, gives all your body a chance to relax and exercise. Circulation improves. So do digestion and appetite. And the good, fresh air you get into your lungs is a reservoir of strength against the day's work and worry. If you can form the daily habit of both a morning and a night "turn," around a few blocks, you are building up an escape from all kinds of trouble for yourself. You'll find you can "walk out" your perplexing problems.

"Hon. Vincent Massey invites political parties to bury the hatchet" read a headline. In whom?

Belgium has a drive for the construction of houses for small families.

### "HANDICAP BE HANGED!"

This was the subject of a lecture and demonstration given by Mr. W. R. Watson, a graduate of Alberta university and a gifted young man whose overcoming of physical handicap is a source of inspiration to able-bodied people.

His early school days were spent at Macleod. He later went through university, and despite his handicap of not possessing arms, became so dexterous with his feet that he was able to write and do many things which ordinarily would be done by hands. He went through his university course with honors.

"It seemed to me the most natural thing to do," was his comment when conversing on his handicap and the strong mental power required to overcome it.

On Monday evening he gave a demonstration in the opera house, showing how he shaved, ate his meals, wrote with his foot or with a pencil held in his mouth. He is also the possessor of a fine tenor voice, and his programme was interspersed with vocal solos.

His book, entitled "My Desire," has gained wide publicity. Requests have been made from Sweden and Hong Kong for copies, people having read of it in the book reviews of daily newspapers. Mr. Watson is an ardent advocate of vocational training for the physically handicapped, and his own life's record is a striking demonstration of what can be accomplished. He has received much encouragement for this branch of his work. It is his aim to travel around the world, an objective which doubtless he will accomplish, for he has overcome obstacles which many would have regarded as almost insuperable.

Major Pattinson acted as chairman, and the following assisted in the programme: Alfred Moores, violin solo; soprano solo, Miss Winona Taylor; John Pietraszko, violin solo. Miss Madelaine Chardon, of Blairmore, accompanied on the piano.

Copies of Mr. Watson's book may be obtained at \$1.00 by applying at McBurney's drug store, or through The Journal office. They are sold or a non-profit basis, in order that Mr. Watson may receive the full proceeds for carrying on his work.

### MISCELLANEOUS

Mrs. R. K. Little and daughter Kay will leave on Sunday for Vancouver to spend the holidays.

Fraser McLeod, of Lethbridge, was visiting his parents, Mr. and Mrs. A. W. H. McLeod, during the week.

Mrs. White, of Pincher station, spent two weeks here visiting her daughter, Mrs. W. E. Read.

Answer to the question in front page box is: From 4000 to 6000 years old.

A. S. McLintock and Earl Price attended a convention of radio enthusiasts in Lethbridge. Both are operators and have short wave sets which communicate with other operators at distant points.

Angus Morrison, secretary of District 18, Mine Workers' Union of America, was here on Tuesday in connection with applicants appearing before the Workmen's Compensation Board.

Noel Coward's famous play "Cavalcade," the film version of which was shown last week at Bellevue, attracted quite a large number of people from surrounding towns. "The Sign of the Cross," filmed from another noted play which was produced over 30 years ago in London, was shown at the Palace and the Orpheum, and elicited many favorable comments.

Coleman Tennis Club was represented at Fernie on Sunday by the following players, to play against Cranbrook players: Mr. and Mrs. I. Lindoe, Mr. and Mrs. Sidney Short, Mrs. A. E. Graham, Miss Mae Bell, Reg. Jones, George Jenkins, R. Shone, Mr. and Mrs. Albert Short. Coleman won three events, and other events in progress were stopped by the heavy rainstorm which swept the district.

Flowers for any occasion may be ordered, through Frank H. Graham,

### LOCAL AND GENERAL

The Ladies' Aid of St. Paul's church, held a strawberry tea in the club rooms on Saturday, which was attended by quite a number of ladies.

Major Pattinson attended the annual convention of the Union of Alberta Municipalities held in the Palliser hotel, Calgary.

Leonard W. McDonald, of Blair-

more, has been transferred to the Safeway store in Calgary. He worked during the past year in Blairmore store of Safeway Limited.

Mrs. G. Pattinson held a lawn so-

cial on Friday afternoon at her home

in Sixth street, in aid of Minerva Chapter, Eastern Star. Many were

present from town and Blairmore,

Deleville and Hillcrest.

A deluge of hail and rain on Sun-

day afternoon cut short picnics and

other outdoor activities. A heavy

wind preceded the storm, which came

from the south and swept eastward

with fierce velocity. One soaking

such as that did more good than

hours of sprinkling with the hose on

gardens.

A visitor was in from Michel last

Friday evening. He was so impres-

sioned with the activity that he told his

friends he would like to live here.

The band was playing, a dance was

in progress in the opera house, an-

other in the Polish hall, and a boxing

and wrestling programme in the

arena.

The sagacity of dogs is at times

clearly demonstrated. Mrs. Fergu-

son, of the Elite Cafe, has two span-

iels which know the 4 o'clock whistle

at the International mine as well as

any person. Immediately it sounds,

they whine at the door to get out and

immediately bound to the mine to

meet Mr. Ferguson. T. Flynn has a

collie which will come down from

Sixth street regularly just before the

children come from school, and meet

hem at the school door.

**BILINSKY WON AGAINST DIETRICH IN WRESTLING BOUT**

Bilinsky won in the seventh round in the arena on Friday. Dietrich won the first fall in the third round in 6½ minutes with an arm lock; in the fifth round Bilinsky pinned Dietrich in 3 minutes with a double armlock, and again in the seventh round in seven minutes.

Jim Stanmore, of Lethbridge, and "Mushy" Calahan, of Calgary, boxed six rounds to a draw in a very spirited encounter, which many thought should have been awarded to Stanmore on points.

John Campbell and Paul Tarby fought four rounds as lightweights, Campbell winning on a technical knockout in the fourth round.

Frank Barringham refereed the boxing matches, and Henry Johnson, of Calgary the wrestling match. All Pass towns were represented.

There is talk of arranging another card with contestants from Pass towns, and as a headliner two boxers or wrestlers from Calgary and Edmonton. Jimmy Burrell, of Blairmore, is ready to meet any boxer Coleman puts in the ring, and Axel Boyd, of Leduc, Alberta, wired a challenge to the winner of the Bilinsky-Dietrich bout.
